We are informed that a general meeting of all the French cycling clubs is to be held shortly for the purpose of draw-ing up a code of rules for foot passengers, which is afterward to be submitted for approval to the public authorities. We have been permitted to examine the first draft of this remarkable scheme,

There is no doubt that some of the most brilliant planets, such as Venus and Jupiter, are capable of easting distinct shadows, as may be seen any fine even ing in the tropics. Not long ago M. L. Guiot observed that Jupiter threw a dis-tinct shadow of his watch upon a wall, and that he was able to read a newspa-per by the light. M. Moye also finds that Mars is able to cast a shadow, but a much fainter one than Jupiter. He was also able to count the number of words in a newspaper placed in the light of the planet entering by a window, but he could not read them. - Exchange.

of the liver and stomach. Impurities in the blood tend to poison the vital fluid. The failure of the organs to properly remove the waste from the system allows the germs of disease to accumulate and not until the whole system is affected do many realize that impure blood is the cause of all their trouble. Mr. Sidney S. Masten of Pleasant Valley, N. Y., whose testimonial letter follows, is a well known painter. His health was impaired by lead poison and gradually his whole system became affected. He resorted to Hood's Sarsaparilla and in it found a purifier of the blood and a restorer of the liver and kidneys to natural action; in short, a good appetite and renewed strength and vigor has followed his taking Hood's Sarsaparilla.
